

# Compliance Auditing Services

**An integrated approach to compliance with best-in-class experience across multiple industries.**

Many companies have been required by PSM and/or RMP to audit their process safety performance for the last decade. aeSolutions understands that our clients are looking for more than a yes/no evaluation of the regulatory requirements. When properly executed, auditing provides you with the data needed to make informed decisions toward continuous improvement. We provide a cross functional team of auditors that understand the interrelationships of the process safety and risk management elements to perform this essential part of the process safety lifecycle.

## Value of an Integrated Approach to Auditing

- Develops functional management systems
- Enhances operational efficiency
- Provides performance metrics for overall program health
- Promotes compliance & conformance
- Creates sustainability

## aeSolutions Audit & Gap Assessment Services

- Process Safety Management (PSM), 29 CFR 1910.119
- Risk Management Program (RMP), 40 CFR 68
- National Emphasis Program (NEP)
- Risk Based Process Safety (RBPS)
- Safety and Environmental Management Systems Audit (SEMS)
- ISA 84/IEC 61511 Gap Assessments
- Recognized and Generally Accepted Good Engineering Practice (RAGAGEP)
- Business Transaction Risk Screening (Purchase or Sale of Operations)

## Your Business Value

Compliance with evolving regulatory requirements, industry standards, and corporate initiatives can be overwhelming. aeSolutions offers a comprehensive approach addressing the definition of scope and objectives, development of the work flow process, coordination of onsite activities, detailed protocols and customized reports.

**By adding fresh eyes to your team, aeSolutions provides a new perspective and increases your process safety improvement value.**

We leverage our diverse industry experience to provide you sustainable best management practice recommendations. As your outsourced audit solutions partner, aeSolutions can help develop and implement programs around your risk management systems including ongoing compliance, tiered audits, self-assessments, and Responsible Care®.

## Measurable Results

aeSolutions strives to be a contributing and valued element of your business risk strategy. We provide comprehensive results that can be used to monitor and improve your process safety management systems in line with your performance expectations. We communicate relevant metrics at a level meaningful to your leadership team and stakeholders engaged in governance roles.

## Putting Our Experience to Work for You

As a supplier of complete process safety engineering and automation solutions, our team includes chemical, mechanical, and electrical engineers with industry experience in design, maintenance and operations. Many of our auditors are also part of our risk assessment team as facilitators. Averaging 15 years of experience in process safety implementation and compliance, aeSolutions provides an integrated team of professionals versed in all aspects of the process safety lifecycle.
